

QuietFlow Acoustic Louvers

REDUCE FAN NOISE. KEEP THE PERFORMANCE.

EFFECTIVELY REDUCE FAN NOISE & IMPROVE SOUND QUALITY

QuietFlow is a drop-in foam louver system built to integrate with existing equipment.

- Improves sound quality
- High performance Soundfoam ML (melamine)
- Dynamic 3-dimensional cutting capability
- Customized louvers to maintain equipment performance and airflow
- ASTM E84 Class A fire rated

HOW IT WORKS

- Provide your equipment specs to Soundcoat's in-house engineering team
- Collaborate on louver patterns for airflow and noise optimization
- Performance simulation available through our proprietary Soundcoat 360 Solution™ process
- Quick turnaround on prototype designs for airflow and acoustic test validation
- Melamine foam processed on specialized foam converting equipment

MARKET SECTORS:

TYPICAL APPLICATIONS:

DATA CENTERS
EV CHARGING
HVAC SYSTEMS
SERVER RACKS
POWER GENERATION
MEDICAL EQUIPMENT
